

Module 1: Introduction to Variables (Grades 3–5)

Lesson Objectives

Students understand variables as containers for information.

Students can assign and change variable values.

Students use variables in a simple program.

Lesson Plan (45 min)

- Hook discussion about remembering information.
- Explain variables using real-world analogies.
- Guided practice creating personal variables.
- Interactive variable swap game.
- Reflection and review questions.

Example Code

```
name = "Alex"
age = 10
favorite_color = "blue"

print(name)
print(age)
print(favorite_color)
```

Student Activity: Digital Pet

```
pet_name = "Fluffy"
hunger = 5
energy = 10

print(pet_name)
print(hunger)
print(energy)
```

Extension: Change hunger value after feeding.
