

Module 2: Loops & Patterns (Grades 4–6)

Objectives

Understand repetition using loops.

Recognize patterns in programming.

Create simple loop-based programs.

Lesson Activities

- Clap pattern warm-up.
- Introduce for-loops.
- Guided coding practice.
- Independent challenges.
- Class review discussion.

Example Loop

```
for i in range(5):  
    print("Hello")
```

Challenges

Print numbers 1–10.

Create star patterns.

Draw a square using turtle.
