

App Name: Kids In The Kitchen

Group Info:

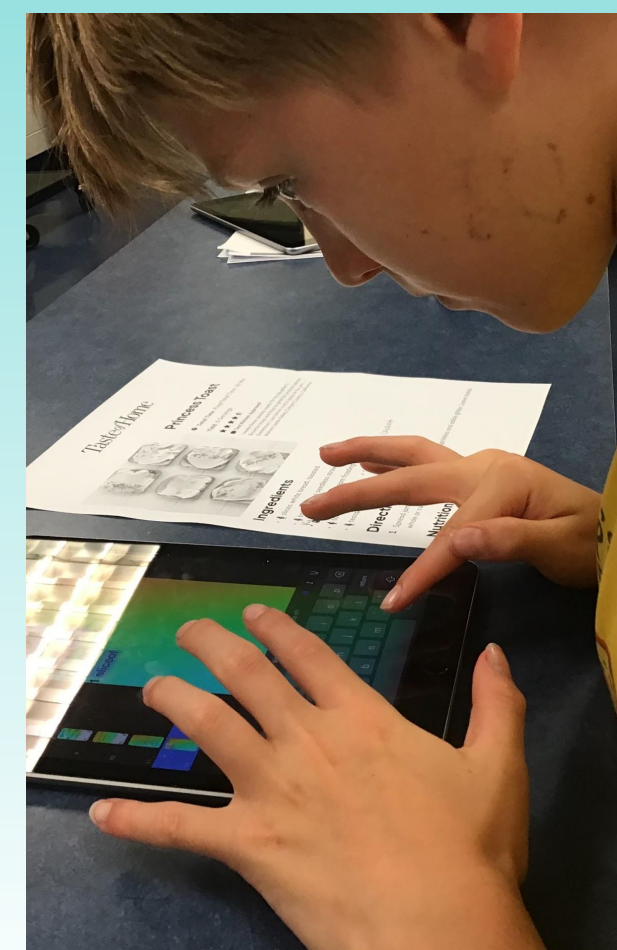

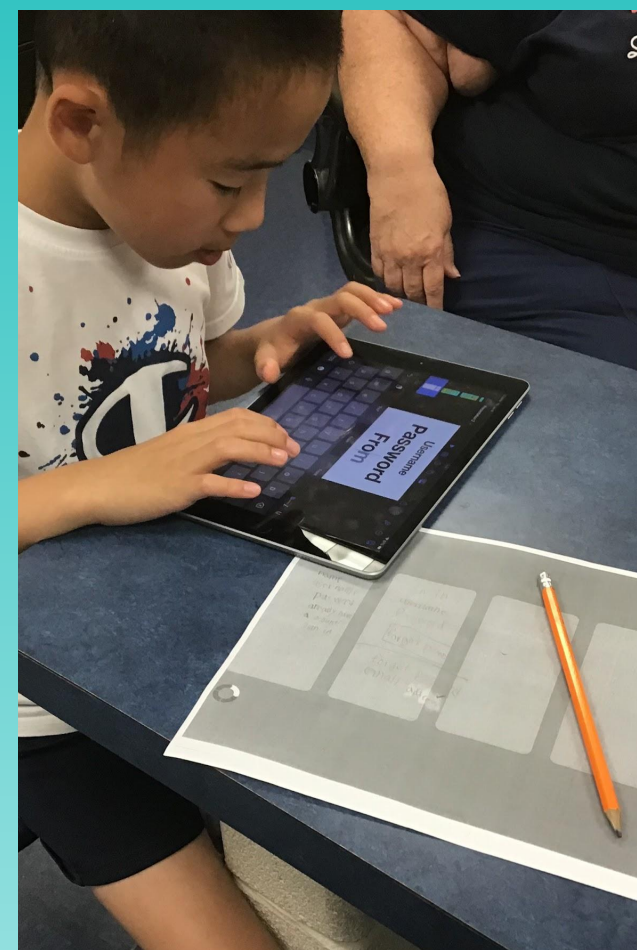

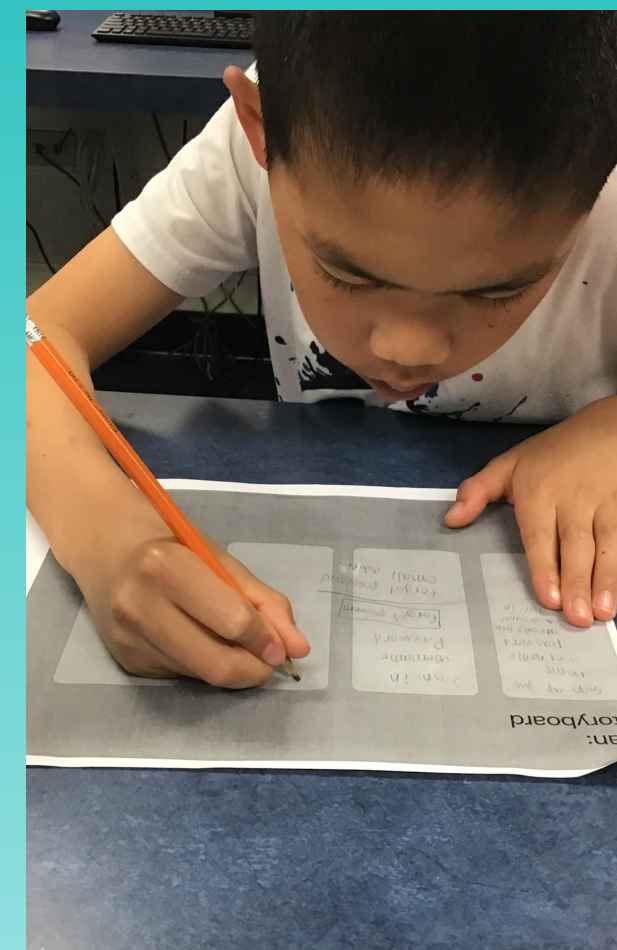

We are students from
Riverview Elementary
Middle School grades
five and six

Wesley Tanudjaya
Wilson Tanudjaya
Conner Yates

App Rationale:

Our app will help kids ages five and up to learn how to cook by following directions using recipes with help from an adult. Kids will learn how to mix ingredients, to measure ingredients and, to measure read and follow the directions for simple recipes.

Design Process:

Target Audience:

Some of our thoughts for making this app considering healthy foods that kids can make and enjoy. We went online to find recipes that we thought kids would like and easy to make. We choose the ones we like the best. I think our app still needs text boxes, interview with Mrs. Baker, and complete our animations. We want to have a junior chef of the week. They will be featured with their famous recipe that they have created. The junior chef is chosen by the number of likes for his/hers recipe.
