

App Name: Jobby Lobby

Group Info:

Bethany Singleton-
Grade 8, Thomas Walker
High School, Lee County

Arielle Starrett- Grade 6,
Pennington Middle
School, Lee County

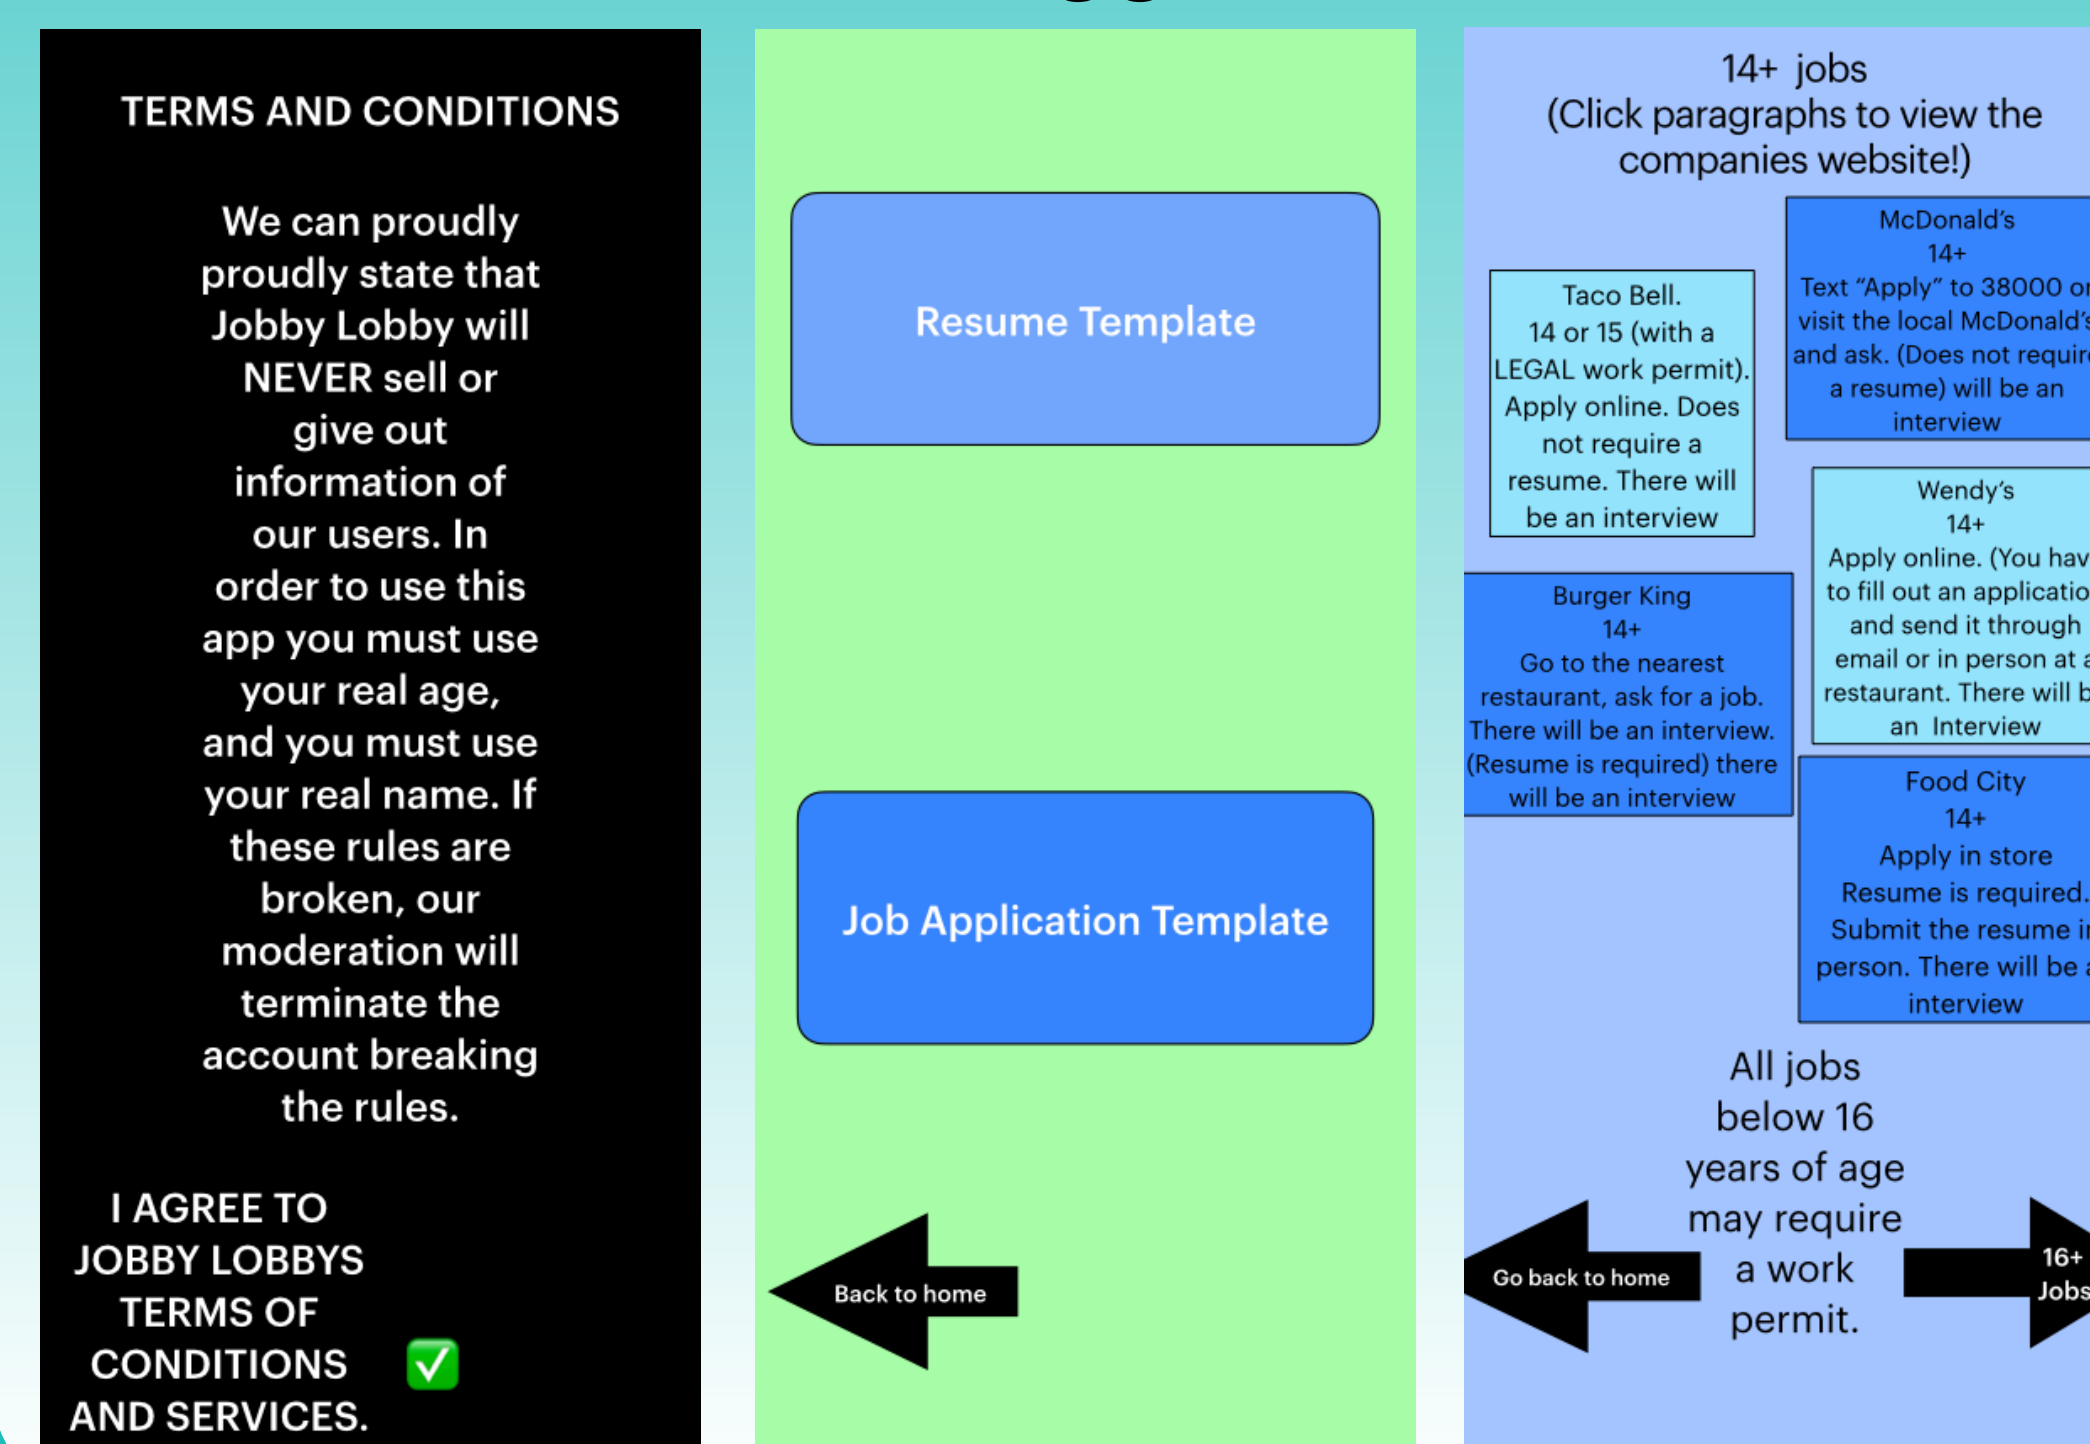

App Rationale:

We designed our app to help address high unemployment rates.

Design Process:

Jobby Lobby started as a simple keynote slideshow when Bethany attended Code Camp last year but then Arielle joined the team and together we expanded on features and now its bigger and better.

Target Audience:

We want to help unemployed people ages 14 and up to find employment.

User Interface, User Experience, Coding Concepts:

Users will navigate our app using buttons. We used a cool color scheme because they help to calm the mind and incorporated functions into our app.

Next Steps:

We would like to make our app more accessible by adding color blind mode and variable text sizes.
